

Sopra Steria Backend test app

Wellcome to Sopra Steria Backend test app. This app was done with the best quality i could offer. Hope you enjoy it!

Dependencies

This test app uses a the following open source code to work properly:

- [Node.js](#) - As server
- [Express](#) - As API framework
- [Request](#) - As http resource handler

Installation

It requires [Node.js](#) v4+ to run.

Install the dependencies and devDependencies and start the server.

```
$ cd app_folder
$ npm install
$ node app.js
```

Paths

Get user data filtered by user id -> Can be accessed by users with role “users” and “admin”

```
http://localhost:3000/getUser/id/[requested_user_id]/[auth_us
```

```
er_id]
```

Get user data filtered by user name -> Can be accessed by users with role “users” and “admin”.

```
http://localhost:3000/getUser/name/[requested_user_name]/[auth_user_id]
```

Get the list of policies linked to a user name -> Can be accessed by users with role “admin”

```
http://localhost:3000/getUser/policy/[policy_id]/[auth_user_id]
```

Get the user linked to a policy number -> Can be accessed by users with role “admin”

```
http://localhost:3000/getPolicy/[requested_user_name]/[auth_user_id]
```

Auth

The authentication is always the id of the user who is requesting

Ex.

```
http://localhost:3000/getUser/name/BritnEy/44e44268-dce8-4902-b662-1b34d2c10b8e
```

where 44e44268-dce8-4902-b662-1b34d2c10b8e is the id of the user how

is requesting and will determinate the permissions.
